

SOUTH BAY WORKFORCE INVESTMENT BOARD

Developing a Pipeline of Skilled Workers

The South Bay Workforce Investment Board is pleased to announce that two grants have been awarded to fund the development of **customized, innovative ENGINEERING Pre-Apprenticeship and Apprenticeship** models geared to support the **Advanced Manufacturing Sector** in the South Bay.

To ensure we meet all of your goals, we have identified highly experienced project partners. These partners have experience with manufacturing and will guide us in identifying relevant skill sets; creating competency frameworks, designing the training plan and registering the Apprenticeship with the Division of Apprenticeship Standards.

BE INVOLVED: We are seeking input from area businesses and will be sending you a survey to assess how we may best help you **build a pipeline of skilled Engineers to support the growth and competitiveness of your organization.**

WATCH FOR OUR SURVEY SOON!

Sign up to become an industry partner and become an active stakeholder in the development of your workforce pipeline!

Innovative Apprenticeship and Your Business

Through grant funding, our Project Team will develop Pre-Apprenticeship and Apprenticeship Engineering **models that can be customized to your specific workforce, training and production needs.** The grants will fund the planning and information gathering necessary to develop the model and apply for registration. Using your specific requirements, we will custom design an Apprenticeship that minimizes any change or disruption to your current recruitment, hiring and training programs.

WORKFORCE DEVELOPMENT BRIEFING

Funding

Funding is available from Federal, State and Local agencies to support the development costs and implementation specific to the engineering-related needs of the business community. Business may be **reimbursed for the cost of curriculum development, training delivery and new hire wages**, among other related activities.

The SBWIB will be coordinating grant activities to support your workforce development needs.
